# Aircrafts maintenance planification system

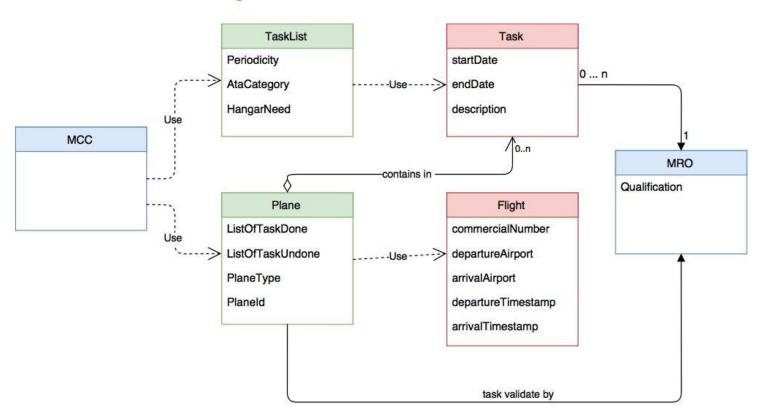

#### 1 - Definition of the system

- Aircraft maintenance planning software.
- Sets of tasks to do in the coming weeks.
- Association of human and technical resources for all aircraft maintenance.

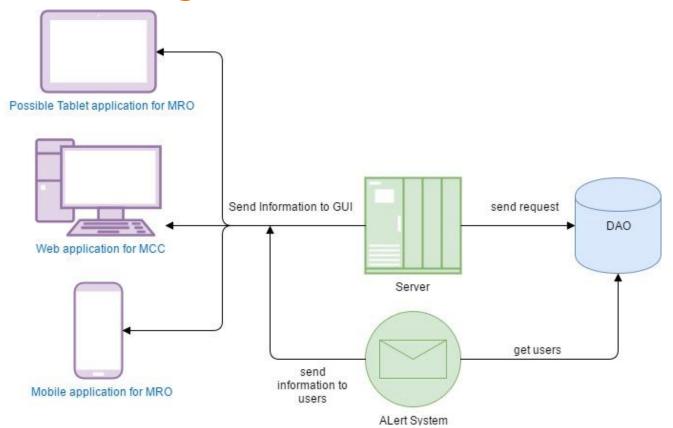

#### 2 - Users

- Maintenance Control Center (MCC): distribute tasks to some MRO
- Maintenance Repair and Overhaul (MRO): consult planning of tasks.

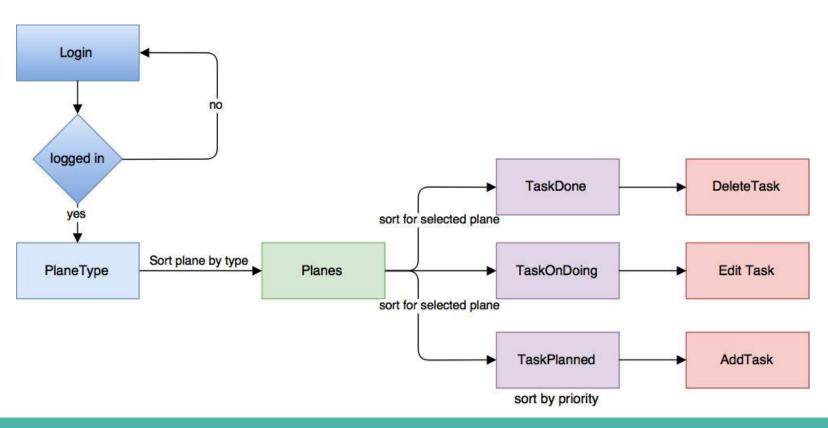

# **3 - Business Object**

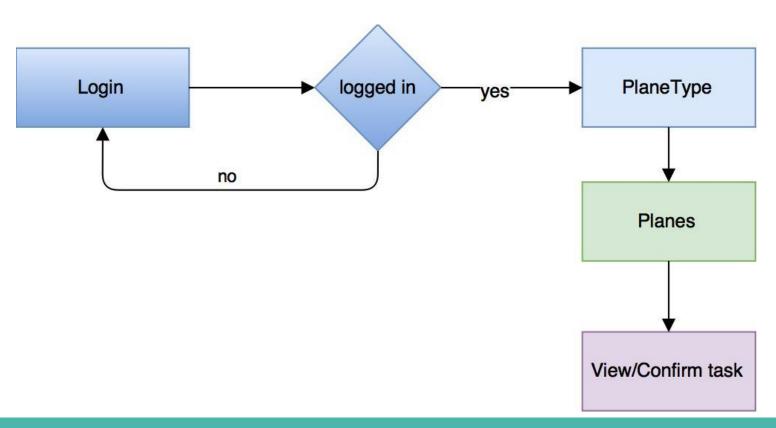

# 4 - Technical diagram

# 5 - Navigation diagram : MCC interface

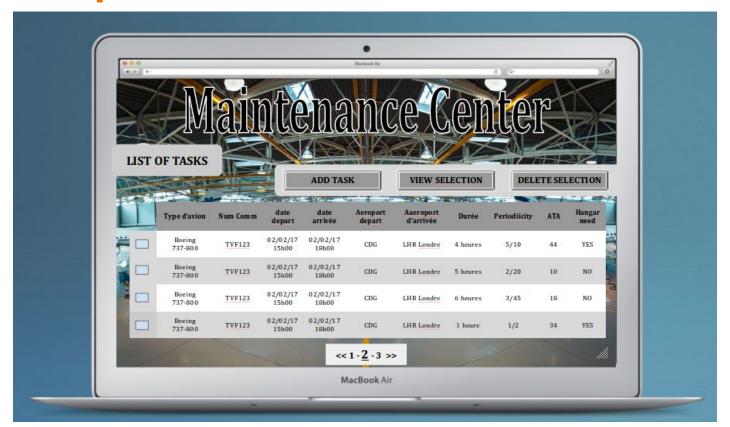

# 5 - Navigation diagram : MRO interface

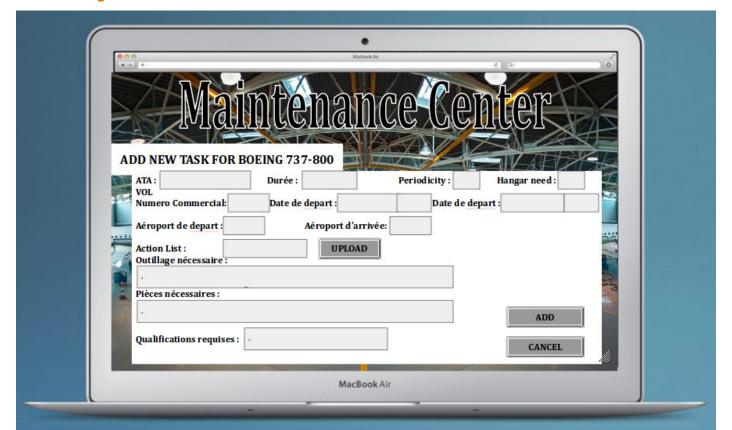

## 6 - Mockups : homepage/log-in

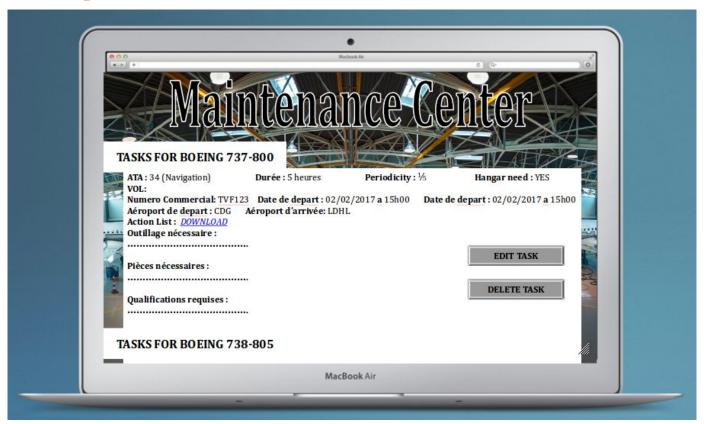

# 6 - Mockups : task list

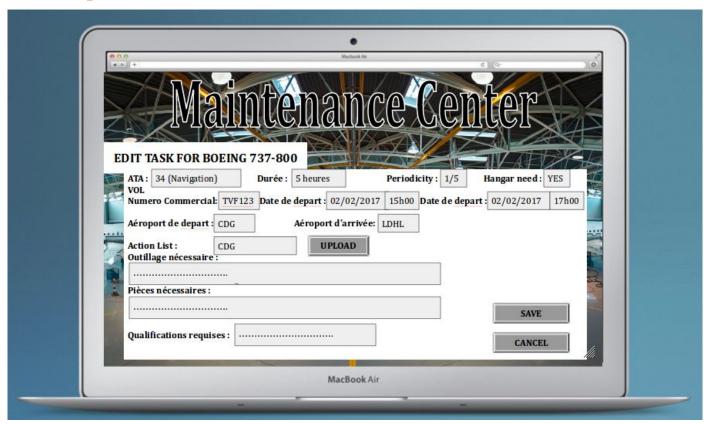

#### 6 - Mockups : add task

# 6 - Mockups : view task

### 6 - Mockups : edit task

# 6 - Mockups mobile: login

#### 6 - Mockups mobile : task list

# 6 - Mockups mobile : view task

#### 7 - Web services

Туре	URL	Behavior
GET	/task/{user_id}	Returns a list of tasks by user's role
GET	/task/{task_id}	Returns all the properties of a task
POST	/task/add/	Add one new task
POST	/task/modify/{task_id}	Modify all the properties of a task
PUT	/task/update/{task_id}	Update one field of a task
DELETE	/task/delete/{task_id}	Delete a task
